Bug Description

When the user fills in the Last Name field, the system values the First Name field. So it is not possible to set the second field: problem is blocking

Step to Reproduce:

1. **Preconditions:** User is on CHECKOUT Page and in the Cart is present at least 1 product, and the Personal Informations are not filled in
2. **Test data:**

username / password : problem_user / secret_sauce

3. Actions

User fills:

- First Name field

- Last Name field

- Zip/Postal Code field

4. Expected Results:

Verify that:

- First Name field accepts only alphabetical values

- Last Name field accepts only alphabetical values

- Zip/Postal Code field accepts only numeric values

5. Actual Results:

When the user fills in the Last Name field, the system values the First Name field. So it is not possible to set the second field: problem is blocking, because the 3 Fields are mandatory.
